

## CCP Nuclear Thermal Hydraulics - supporting next generation civil nuclear reactors (CCP NTH)

### Call for applications for visiting grants

#### Background

CCP NTH provides a number of visiting grants for incoming and outgoing **international visits** to promote and support international collaborations. The purpose of the international incoming visits is to enable UK university\* groups to host international experts for discussion, collaborations and/or delivering lectures. These visits are encouraged to be coincident with one of the CCP technical meetings at which the visitors can also deliver talks to the wider community. Support will also be provided to members of the CCP who wish to visit centres of excellence in computational thermal hydraulics, including, universities, national laboratories and industrial R&D centres. Additionally, to promote collaborations between UK research groups, and universities and industry, CCP NTH also provides T&S support for exchanges of **UK short visits** of up to one week between academic groups, and academics and industry in the UK. The grants will not support the attendance of conferences.

All applications will be assessed by the Management Committee.

#### Visiting grant awards:

##### (1) UK exchange of short visits

- Number: 3 awards per year
- Value: up to £1000.00
- Eligibility: UK Academic staff and PDRAs
- Eligible support: travel and subsistence for up to one week
- Purpose: to support researchers to spend some time in another research group or industrial establishment.
- Award condition: (i) Producing a half-page report within one month of completion of visit; (ii) acknowledging the support from CCP NTH (EP/T026685/1) in publications resulting from the visit/collaboration.

##### (2) International incoming grant

- Number: 2 awards per year
- Value: up to £2000.00
- Eligibility: Applicants: UK Academic staff  
Invitees: Experts from outside the UK
- Eligible support: travel and subsistence for up to one week
- Purpose: to enable UK university groups to host international experts for discussion, collaborations and/or delivering lectures.

---

\* University and academics in this document refer to any institutes or individual who are eligible to receive funding from the UK research councils.

- Award condition: (i) Producing a half-page report within one month of completion of visit; (ii) acknowledging the support from CCP NTH (EP/T026685/1) in publications resulting from the visit/collaboration.

### **(3) International outgoing grant**

- Number: 2 awards per year
- Value: up to £2000.00
- Eligibility: UK Academic staff
- Eligible support: travel and subsistence for up to one week
- Purpose: To support members of the CCP who wish to visit centres of excellence in computational thermal hydraulics abroad.
- Award condition: (i) Producing a half-page report within one month of completion of visit; (ii) acknowledging the support from CCP NTH (EP/T026685/1) in publications resulting from the visit/collaboration.

### **How to apply**

- Deadline: dd/mm/yyyy (Every 6 months, rolling.)
- Length of proposal: No more than 2 pages of A4.
- The proposal should describe the track record of the visitor and the host, the purpose of the visit, planned activities and anticipated output. It should also describe the proposed dates of visit and detailed justification of resources (T&S) requested.
